----- PROPOSED ROUTES

LOS ANGELES AIRWAYS' COPTERLINER—SIKORSKY MODEL S-61. The Sikorsky S-61 Copterliner, a twin-engine turbine-powered helicopter, is capable of carrying 28 passengers, plus a crew of three and in excess of 1,000 pounds of cargo. The spacious airliner passenger cabin of the S-61 Copterliner, scientifically soundproofed and luxuriously furnished with comfortable jetliner seats and large observation windows, ushers in a new era of air travel.

Los Angeles Airways is the world's FIRST scheduled helicopter airline. As a suburban airline-connecting service, LAA serves over 20 cities directly (and 200 indirectly) in the Greater Los Angeles Area for passengers, air mail and air express.
