WARNING
Albert 20

When water is released for electric power generation, a horn will sound and red lights will begin blinking. As long as water is being released, red lights will continue to blink. This is a warning to persons downstream from the dam to be alert to sudden rises in the river. Heed this warning.

MILES
1 0 1

This map is constructed by using a special projection system which gives a perspective effect while the immediate lake area remains in scale. For actual distances from the lake consult the area map.

Data compiled from up to date official maps and aerial photographs.
