

# STATE OF OKLAHOMA DEPARTMENT OF HIGHWAYS

MAP SHOWING CONDITION  
OF IMPROVEMENT  
OF THE  
STATE HIGHWAY SYSTEM

JULY-1-1931

STATE HIGHWAY COMMISSION  
SAM. R. HAWKS - Chairman L. H. WENTZ - Member  
J. F. McKEEL - Member  
A. R. LOSH - State Highway Engineer  
ED. McDONALD - Secretary

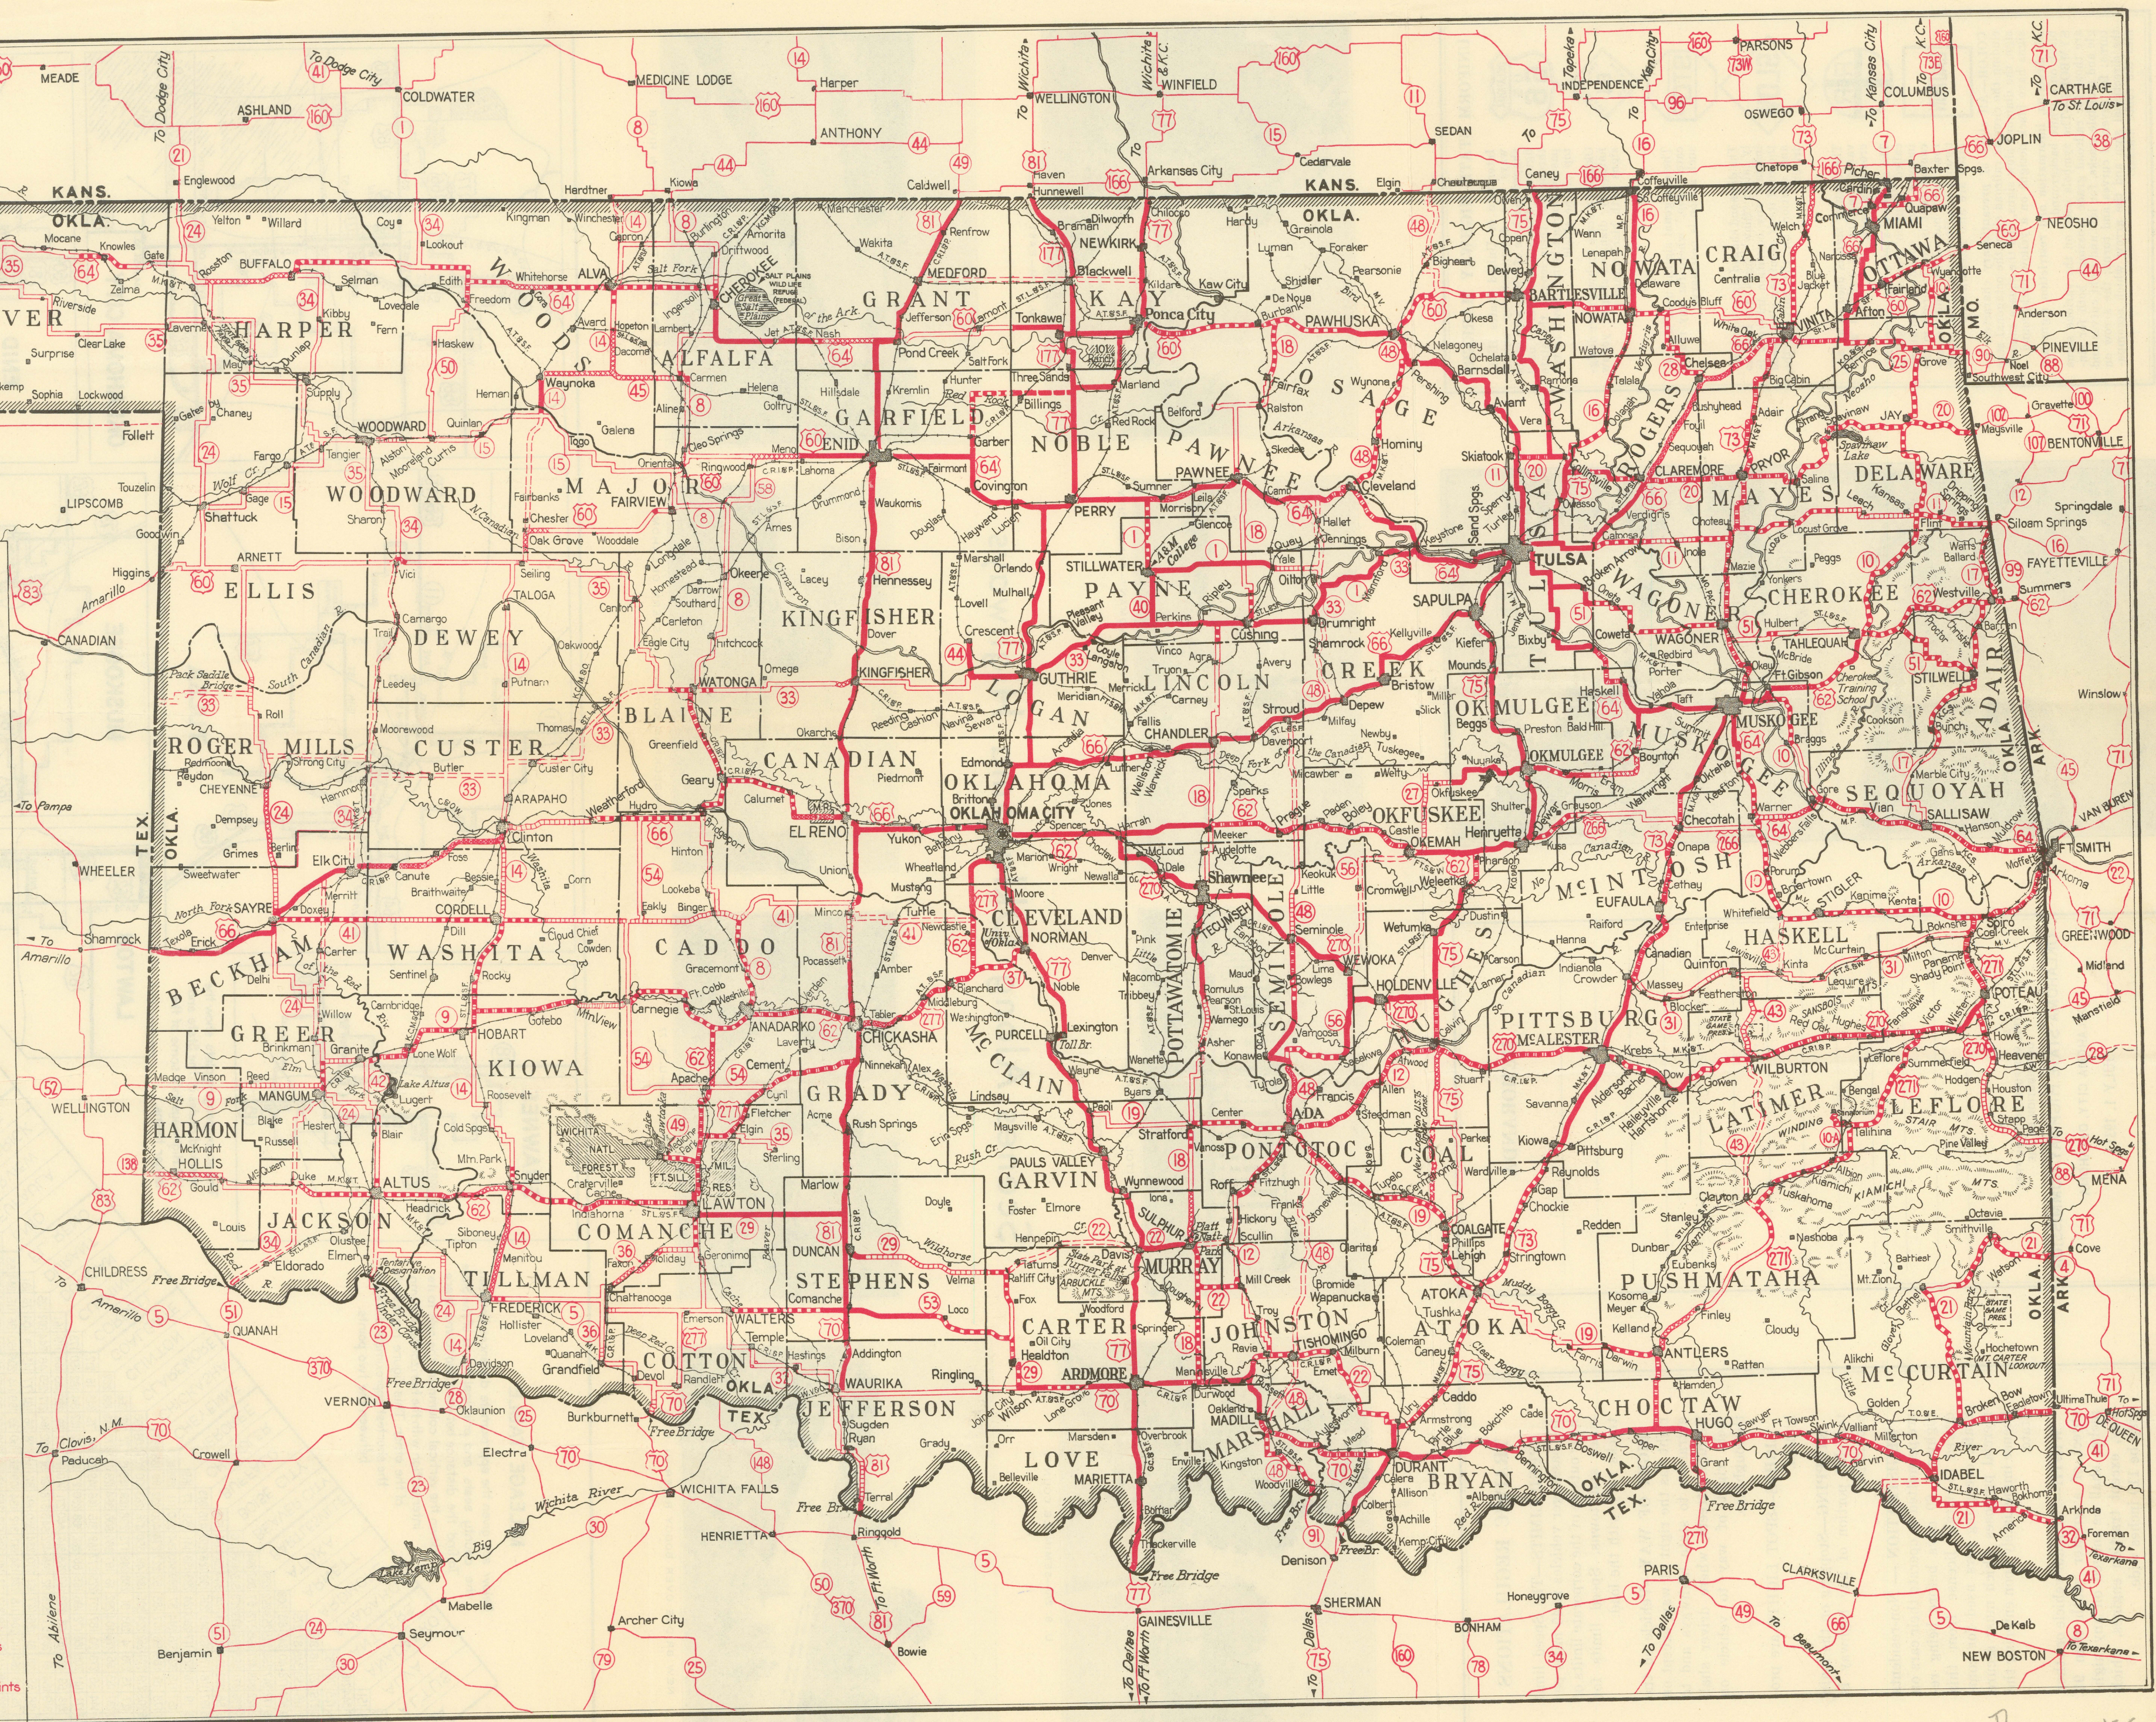

## Legend

- Concrete, Asphalt or Brick Pavement
- Gravel or Sand-Clay
- Standard Graded & Drained Earth
- Earth, Maintained but not Standard Grade
- Earth Grade Under Const.
- Paving Under Const.
- State Highway Numbers
- U.S. Highway Numbers
- Electric Railways
- Railroads
- Highways Not State Maintained

All State Highways are continuously maintained by State forces except as may be noted on Map.  
For distance between important points see other side.

Drawn by GERTRUDE BRACHT  
Supervision of M. R. KESTER

TRAFFIC REGULATIONS

MEMORANDA

UNIFORM STATE HIGHWAY MARKERS

Interstate or United States Highways are designated by shield-shaped markers of white with black figures. The same number is used throughout their length; the state passed through being shown at the top of the shield.

(Oklahoma state highways are designated by diamond-shaped yellow signs with black figures.

(Oklahoma state highways are designated by diamond-shaped yellow signs with black figures.

The diamond-shaped signs, commonly called "Slow" signs, are used to indicate any condition inherent in the road itself requiring slow speed and caution on the part of the driver.

The circular sign is used as an advance warning at railroad grade crossings only.

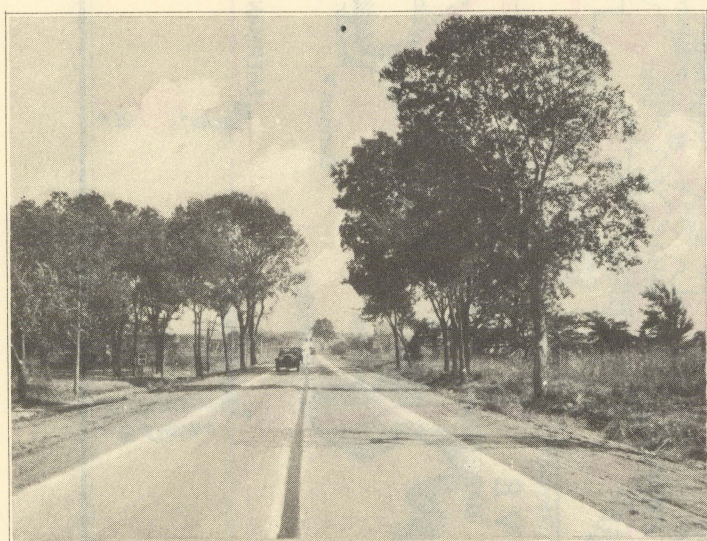

The square shaped signs, commonly called "Caution" signs, are used to indicate any condition requiring caution that is not inherent in the road itself, but which is due to dangerous or adjacent conditions often are also intermittently.

COLOR—All signs of precautionary character, including the circular railroad sign, the octagonal stop sign, the diamond slow sign, and the square stop sign have black designs on a yellow background.

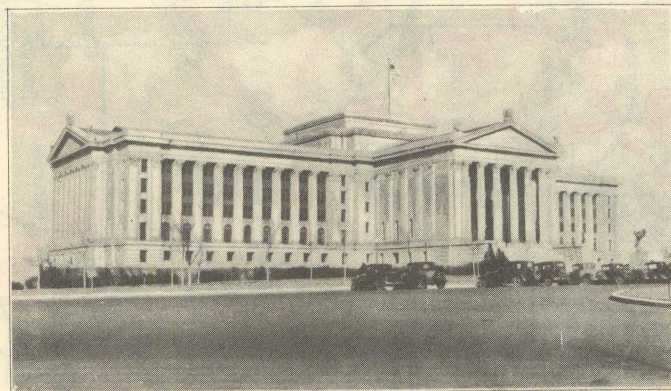

ALL direction, information and restriction signs are black on a white background.

ASMBOLTS—The symbols used on the various signs are those for railroad grade crossings, but for single and multiple tracks, for left and right curves and turns; for reversed curves and turns; the arrows and the directional sign and the route marker.

THE

U. S. 270—SEMINOLE COUNTY

CAPITOL AT OKLAHOMA CITY

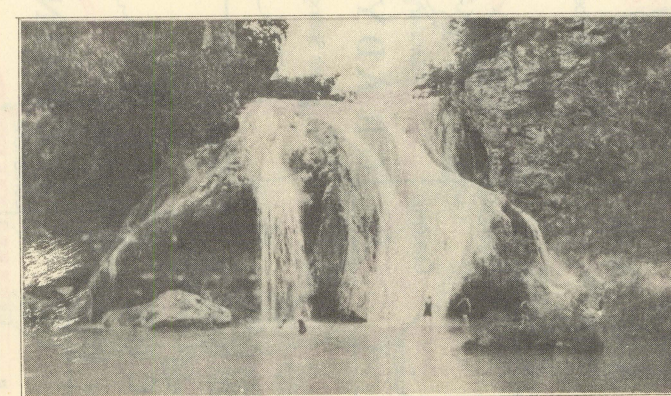

HEROIC BRONZE—"THE PIONEER WOMAN"—PONCA CITY

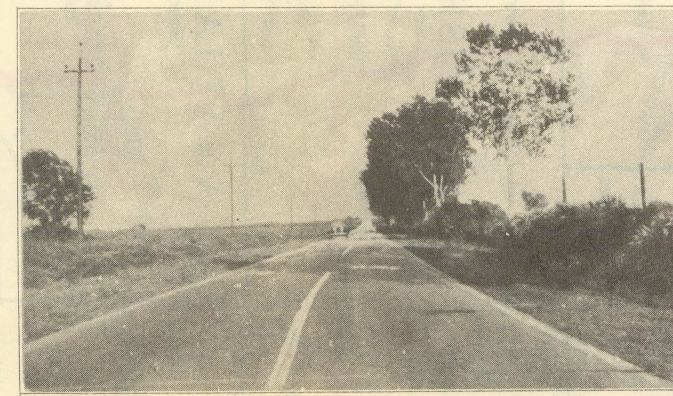

U. S. 64—EAST OF PERRY

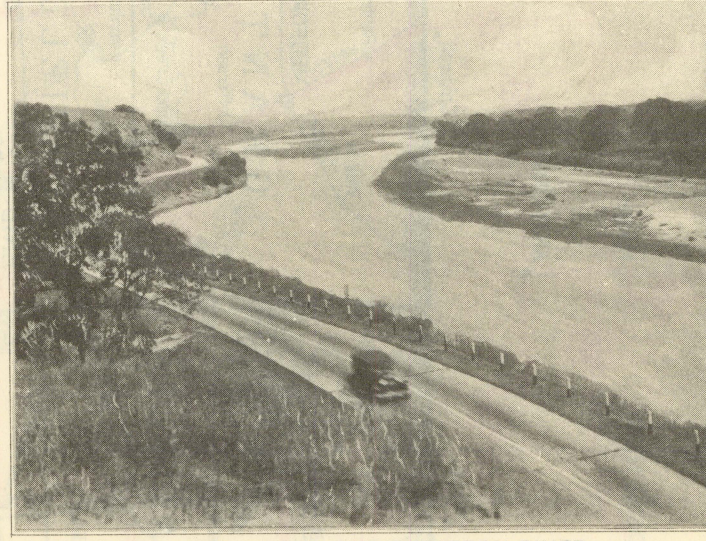

NEW BRIDGE OVER BOGGY RIVER—U. S. 70

TURNER FALLS—U. S. 77

U. S. 66—BECKHAM COUNTY, WESTERN OKLAHOMA

U. S. 77—ALONG THE CIMARRON RIVER

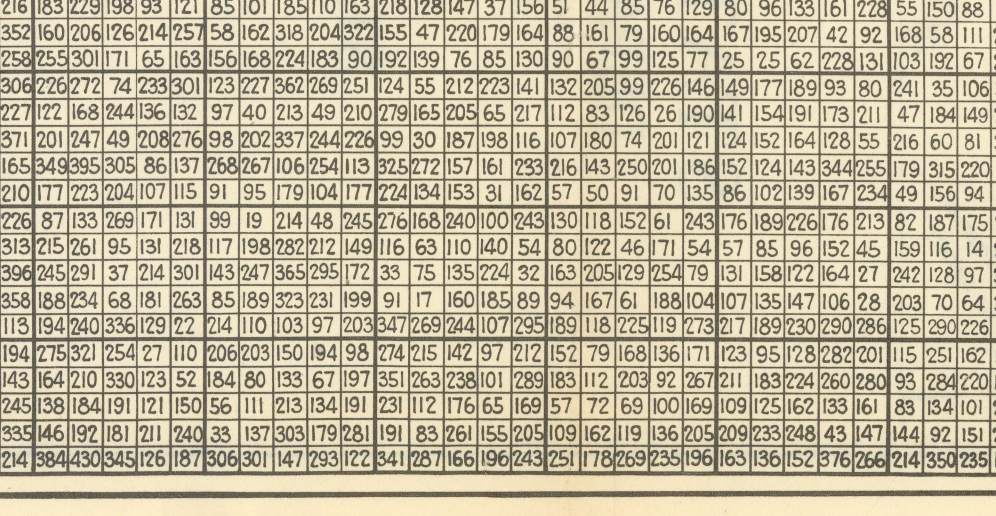

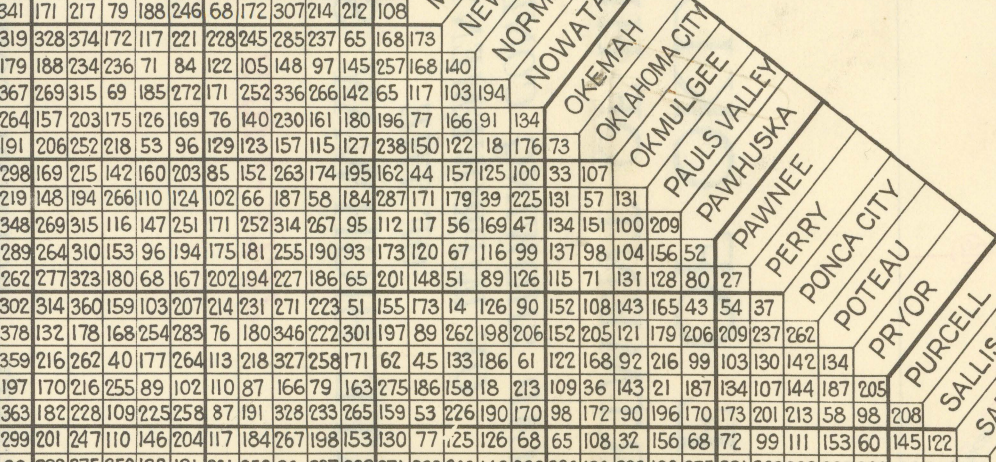

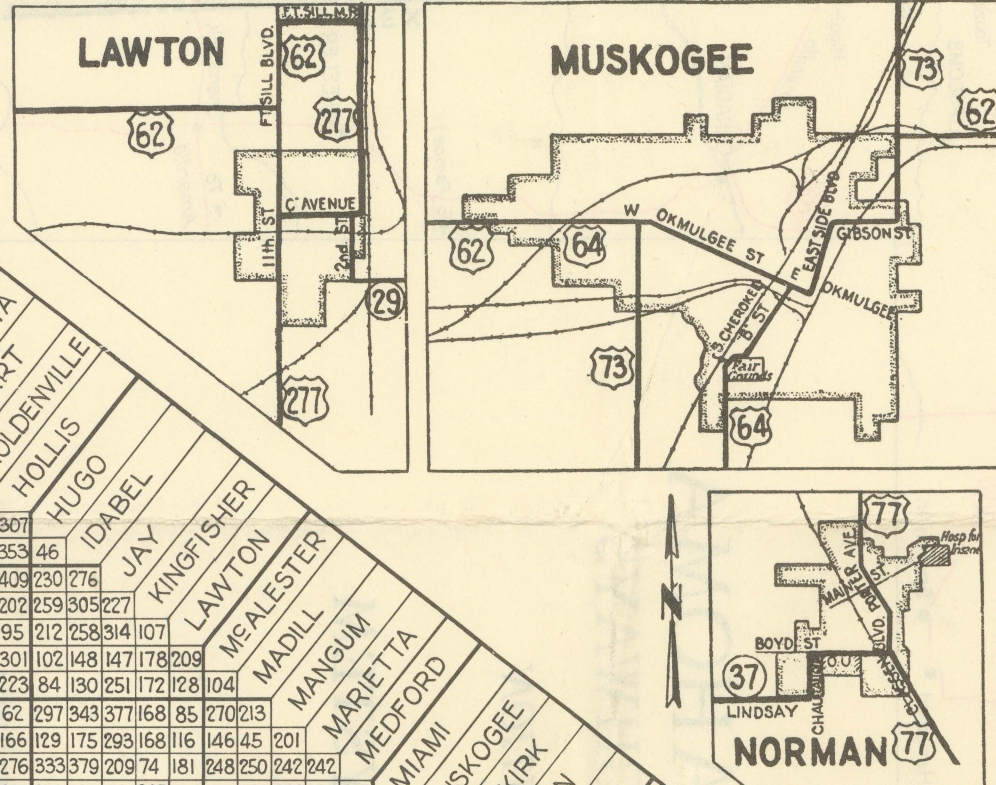

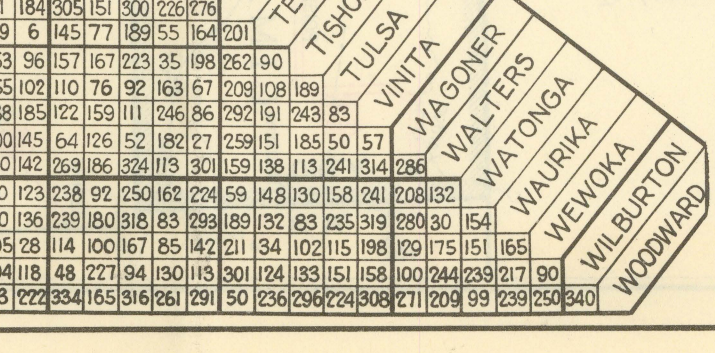

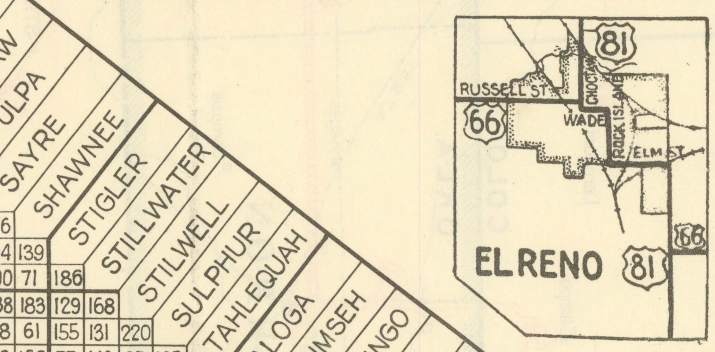

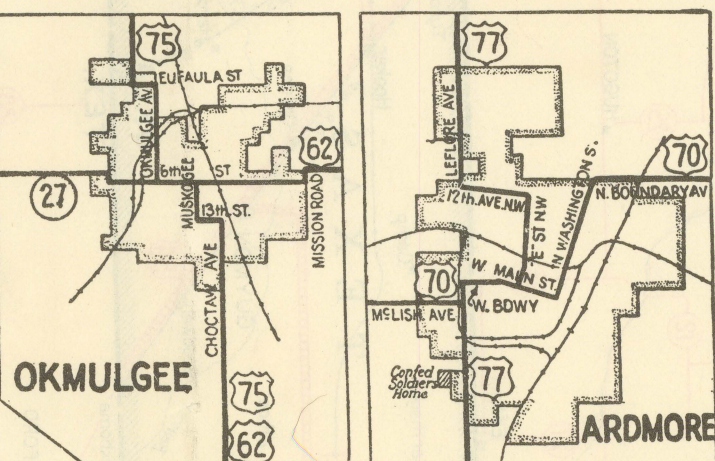

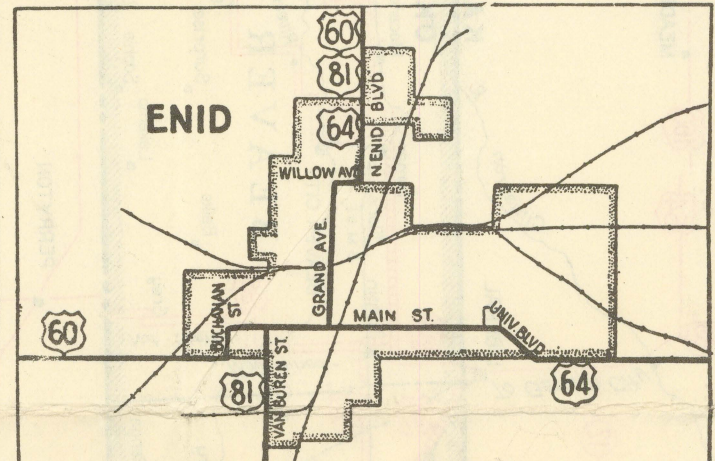

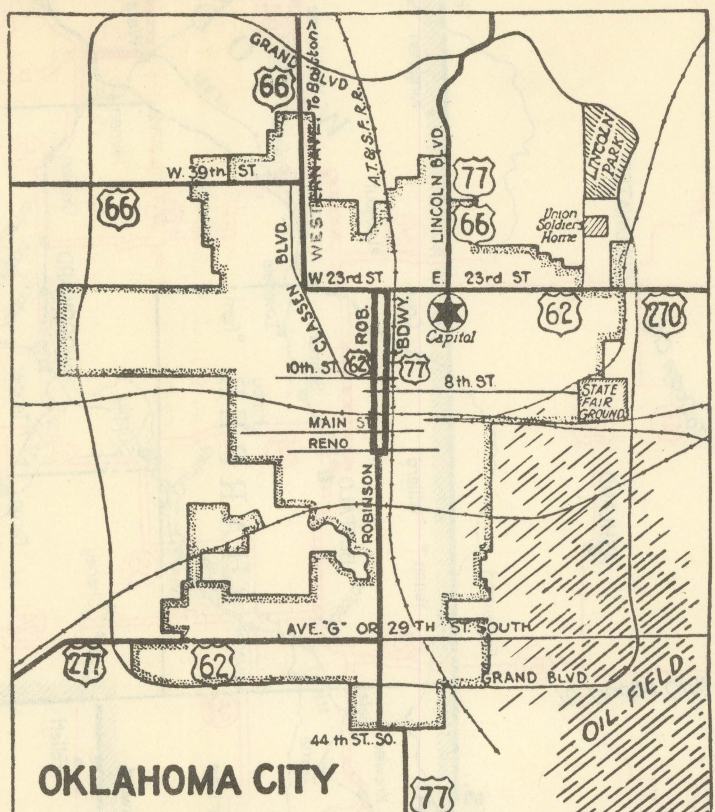

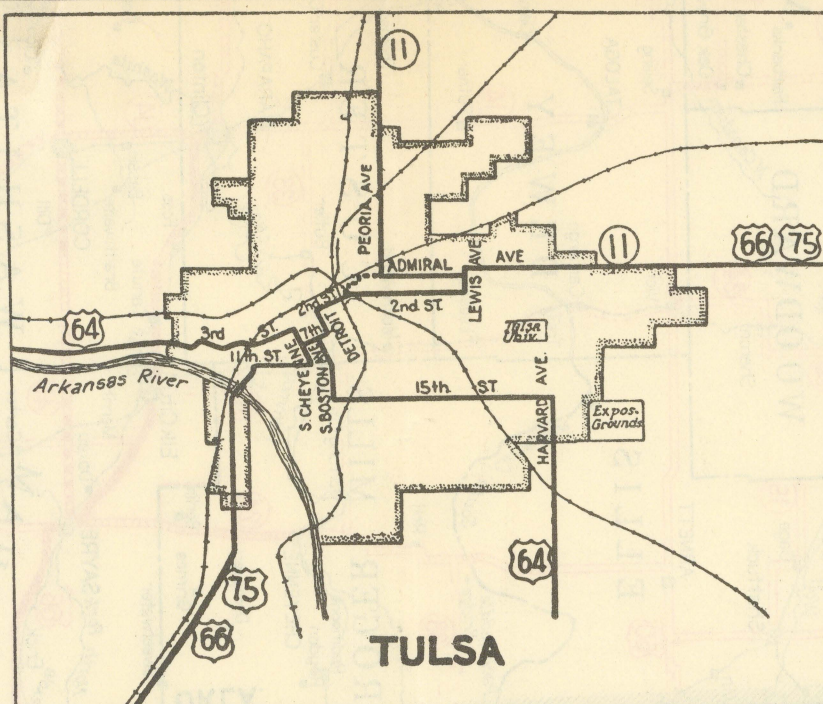

# Scenes Along Oklahoma Highways

### MILEAGE TABLE

Below are given the approximate distances between the county seats and principal towns of the State. To find the distance between two towns, trace down the vertical column of the one to its intersection with the horizontal column of the other. This figure represents the shortest approximate distance between the two points.

A map of Shawnee, Oklahoma, showing major roads and landmarks. The map is oriented with North at the top. The city name "SHAWNEE" is prominently displayed at the top. Major roads include North Ave (marked with a "270" shield), Kickapoo St, Hickory St, Harrison Ave, Barrow St, Highland St, and Island St. A "California College" is marked on the left side. A "Shawnee" label is placed near the center. A "18" in a circle is located near the top right, and another "18" in a circle is at the bottom. A "270" shield is at the bottom right. The map shows a complex network of streets, including a diagonal road crossing the bottom right.

The accompanying plats show the marked routes of the State and U.S. Highways thru some of the larger towns.

Below are given the approximate distances between the county seats and principal towns of the State. To find the distance between two towns, trace down the vertical column of the one to its intersection with the horizontal column of the other. This figure represents the shortest approximate distance between the two points.

The accompanying marked routes of U.S. Highways thru larger towns.
