GRAND RIVER DAM, NEAR DISNEY AND LANGLEY

## A DELIGHTFUL VACATION IS YOURS AT GRAND LAKE (Lake of the Cherokees) and LAKE SPAVINAW in Northeastern Oklahoma

The Lake of the Cherokees (Grand Lake) is created by the \$23,000,000.00 hydro electric dam, built between Langley and Disney, across the Grand River. It is the longest multiple arch dam in the world, water area 55,000 acres, shoreline 1400 miles. Just a few miles below is beautiful Lake Spavinaw, not so large but here's fishing, boating, swimming and every type of recreation just as at Grand Lake. Spavinaw Hills State Park overlooks Lake Spavinaw.

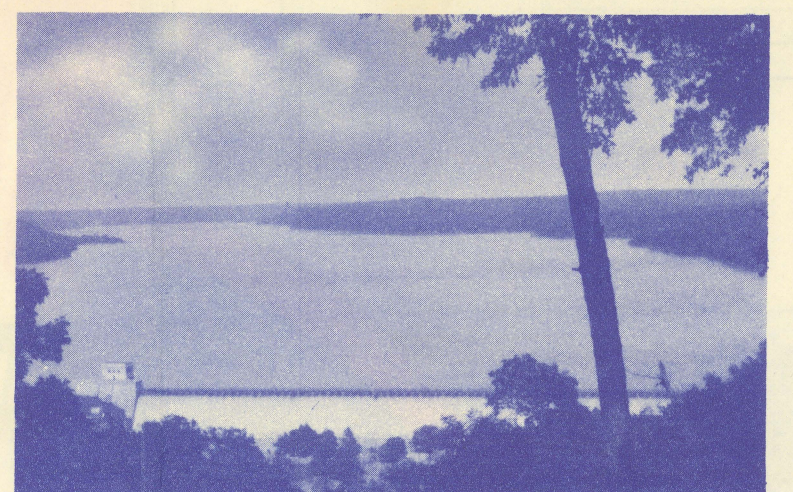

The northeast Oklahoma Lake Region about Grand Lake (The Lake of the Cherokees) and Spavinaw Lake has been the happy hunting and fishing ground for numerous tribes of Indians for the past century . . . now, you too, may hunt and fish or enjoy other

recreational facilities to your heart's content in those same waters.

Every month of the year provides fishing and hunting of some kind. You can fish as you choose and catch fish . . . there's small and large mouth bass, trout, giant channel catfish and others . . . these new large lakes are providing the best fishing in the Mid West.

and here in the Grand Lake-Spavinaw Lake area, you will find every type of accommodation you may desire . . . and every form of recreation also . . . Swimming, horseback riding, tennis, golf, speed boats and cruisers, dancing under star lit skies to the tune of name bands.
